

SLIDING FLOOR

Sustav staklenih kliznih stijena bez vertikalnih profila

CJENIK 2024

Sliding floor

Praktičan klizni sistem s velikim staklenim površinama bez vertikalnih profila za zatvaranje bočnih strana pergola, balkona, terasa, verandi.

Težina kliznih krila prenosi se na donju vodilicu odnosno ne opterećuje nosivu strukturu zbog čega je ovaj sustav idealan za zatvaranje terasa i trijemova te za kombiniranje s pergolama.

Sustav je modularan te ima opciju otvaranja krila u lijevu ili desnu stranu što omogućava maksimalnu iskoristivost prostora.

Donja vodilica visine od 6 do 21 mm unutar je propisanih dimenzija i ne predstavlja arhitektonsku barijeru za osobe s invaliditetom.

Sistem se može brzo i jednostavno ugraditi bez skupih građevinskih radova.

AluK tim pruža kompletnu tehničku podršku i distribuciju.

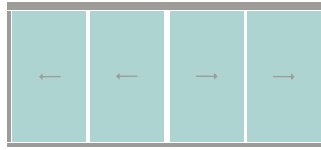

Mogućnost naknadne regulacije od 8 mm (± 4 mm).

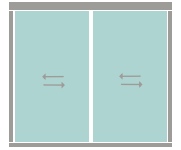

Ugradnjom 'Sliding floor' kliznih stijena bez vertikala stvara se pretpostavka za korištenje prostora tijekom sva četiri godišnja doba. Sistem je prikladan za privatne i komercijalne objekte.
